Scale
1:100

Fiat
G.50 "Freccia"

Fiat G.50 "Freccia"

Before you get down to assemble this model please examine all of parts and read through instruction diagram carefully. Parts with mark with * mean you need to reinforce them in 0.5 thickness cardboard and part in () is part what is in opposite. If you decide to assemble a 1/100 scale make sure that you have a tool to help you deal with a smaller part. Make sure that everything is clear that you can start assembling the model.

Begin assembling with fuselage section, glue strip 1 into part 1, Reinforce part 1a* and 1b* with 0.25 mm cardboard then glue into both begin and end of part. Glue strip into part 2, 3 then glue the segment

Continue with part 4-6 what is an aft fuselage section. Glue strip into part 4 then glue part 5 together. Glue part 6 into segment then glue to fuselage.

Part 7 is a vertical stabilizer and part 8 and 9 is a horizontal stabilizer.

Part 10 is a wind shield. Carefully glue into fuselage due to a small piece.

Part 11 is a part of cowling. Glue strip into part 11 then reinforce part 11a* and 11b* then glue into both begin and end of part 11. Glue part 12 and 13 together and glue to former 11a* then carefully glue part 14 into. Then glue into fuselage

Part 15 and 16 is part for gun cover, carefully glue into its place. And

part 17 is air intake, carefully glue into below of cowling

Reinforce part 18a*, 18b* and 18c*. Insert part 18a* into middle of fuselage and carefully glue part 18b* and 16c* into part 18a*

Wing is combine with 2 parts, 19 and 20 (21 and 22 in opposite) glue together and insert into its place.

Reinforce part 21 and 22 what is a front landing gear. Glue it together with part 23 (See instruction diagram for guide)

Tail landing gear is part 23 carefully glue into fuselage

Part 24 - 28 is wing's landing gear. Reinforce part 24 and glue part 25 together. Reinforce part 26 and 27 glue into part 24,25 as instruction diagram then glue part 28 into both side. Do the same with another wing's landing gear number 29 - 33. Gear cover is part 34 and 35 in opposite.

Assembling propeller with part 36 what is a propeller axe and part 37 and 38 is propeller hub. Carefully glue together then glue propeller blade part 39 into.

Finish this model with glue exhaust pipe part 40 and 41 into below of cowling.

Now your Fiat G.50 "Freccia" is in your hand.

Enjoy modeling
